

Sensitive C-section

WHAT ARE THE BENEFITS?

Working in collaboration with your obstetrician we aim to ensure:

delayed cord clamping (lowering the risk of anaemia)

no separation from parents which ensures early bonding

keeping the microbiome safe
continuous uninterrupted care from the midwife

protection of the mother and baby dyad leads to faster stabilization of your baby's heart rate and blood glucose levels.

minimal separation between mom and baby
resulting in a higher rate of successful breastfeeding

PAYMENT
